

**COURSE NUMBER: TNE072**

# Fact vs. Fiction: Unveiling the Truth in Coatings Performance Testing

Credit: 1.0 LU | PDH

## COURSE DESCRIPTION

Coatings performance testing is essential for ensuring the durability and effectiveness of protective systems in various industrial applications. However, a wave of misconceptions has recently created confusion about the value and interpretation of these tests. Attendees will gain a deeper understanding of how performance testing affects the lifecycle of high-performance coatings, and the session will demonstrate how the right tests can lead to improved asset protection, reduced maintenance, and lower overall lifecycle costs.

**Provider: Tnemec Company, Inc.**

**Length: 1 Hour**

**Method: Live Instruction**

## PRESENTER QUALIFICATIONS

All Tnemec continuing education presenters have been trained on AIA/CES guidelines. In addition, they receive continuous in-depth field training and are considered industry experts.

## LEARNING OBJECTIVES

- Identify and challenge inaccurate coatings performance claims.
- Leverage industry standards to verify the effectiveness of coatings systems.
- Make informed decisions that optimize asset protection and reduce lifecycle costs.
- Apply real-world insights to your next coatings project for improved outcomes.

**TO SCHEDULE A PRESENTATION,**  
visit Tnemec University or contact your  
local Tnemec representative.
