How did you hear about the contest? Other

Describe what makes the nominated tank unique.

The Laurens Commission of Public Works had their Hwy 221 tank make it all the way to a top finalist and do so well in the Tank of the Year contest a couple years ago. So when their next tank repaint came up, they knew they wanted to again raise the bar on the design of their tank re-painting scheme. After some debate, a new and different spin on the USA patriotic flag theme was decided on. The end result is a unique stars and stripes design that jumps out in the small and sometimes sleepy downtown Laurens SC. Also, a unusual element to the logo is that the stars and stripes are not just on the bowl above the catwalk, but also below the catwalk(which is very rarely seen). The tank was very closely monitored for quality control by Mark, Troy and Dennis with the engineer Wiedeman and Singleton. Scott Icenhower did the painting working closely with his crew lead man Angel and the logo painter, Roger Ray to make this idea come to life. The end result is another unmistakable landmark tank for Laurens SC that is not just an impressive looking tank, but a one of a kind original scheme tank like no other. This tank and the background of how they got here is what is great about not just Tnemec's high performance coatings and the annual Tnemec TOTY contest, but also what is great about today's water industry and small town USA towns like Laurens SC!

Owner Company/Contact Name Laurens Commission of Public Works

Address  Laurens, SC

Engineer Company/Contact Name Wiedeman and Singleton

Address

 Rock Hill, SC
